Established 1868

54 Years of Service . . .

Akron is the Rubber Capital of the World. It is the hub of the globe-girdling rubber empires and their vast networks of retail outlets.

Akron-made products are to be found wherever wheels turn. Aside from thousands of rubber products, Akron area plants turn out matches, automobile rims, clay products, plastics, salt, dies, molds, batteries, chemicals, and aerospace equipment, parts and components.

Akron, with 100 motor freight terminals, is the center of the trucking industry. Here is the world's largest fishing tackle factory, the site of the All-American Soap Box Derby, the American Golf Classic and the home of the dirigible and blimp.

The Akron Chamber of Commerce is guiding Akron's progress.

AKRON, OHIO

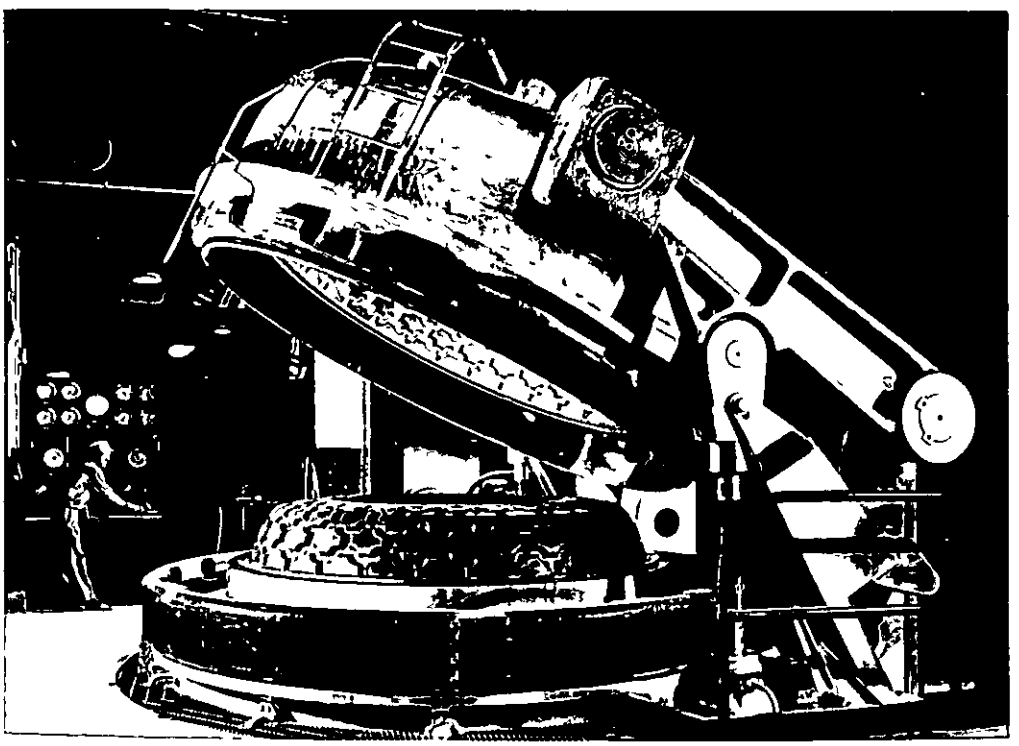
"THE RUBBER CAPITAL OF THE WORLD"

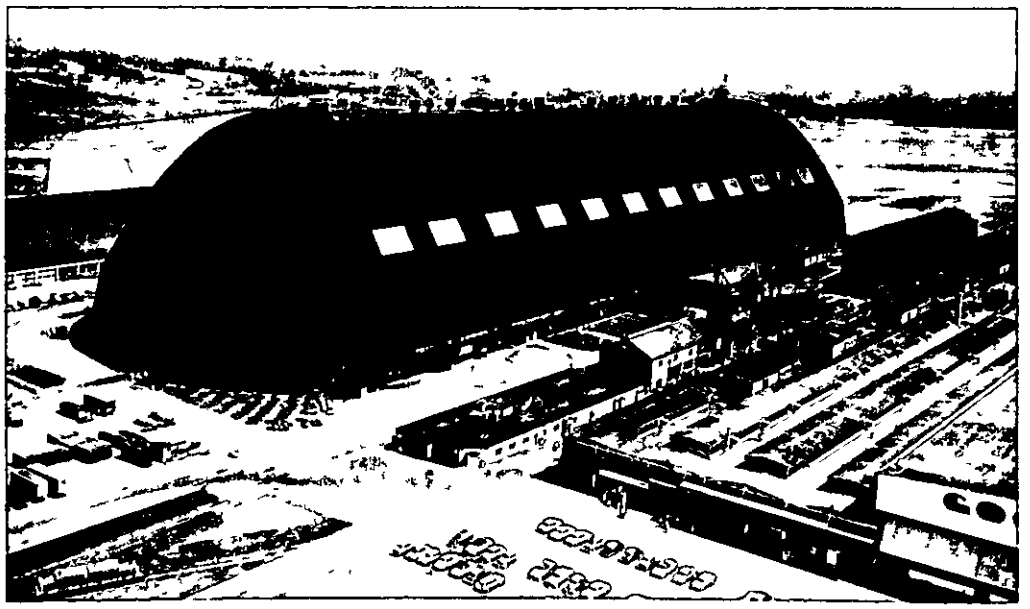
Akron, a northern Ohio city of 288,000 persons, has gained fame through the years for outstanding leadership and contributions in many varied fields

The city is probably best known as the "rubber capital of the world " It is the hub of the globe-girdling rubber companies whose vast networks of fabrication plants and retail outlets play such an important role in our economy This vital Akron-born industry alone represents more than four billion dollars annually in production



GIANT TIRE MACHINERY

Rubber has been the big employer in Akron for nearly half a century The city is the headquarters for administration, sales, financing, distribution and research for B F Goodrich Co , Goodyear Tire & Rubber Co , Firestone Tire & Rubber Co , General Tire & Rubber Co and Mohawk Rubber Co Seiberling Rubber Co is located at nearby Barberton In addition there are a number of smaller specialty rubber companies in Akron



AIRDOCK AND PORTION OF GOODYEAR AIRCRAFT CORPORATION

Goodyear Aircraft Corporation's impressive Airdock, completed in 1929, was erected to house the rigid airships, USS Macon and USS Akron, each of which was 785 feet long and had a gas capacity of 6,500,000 cubic feet

The Dock is approximately a semi-paraboloid shape, well described as a half of a silkworm's cocoon, cut in two the long way It is 1175 feet long, 325 feet wide and 211 feet high Its 364,000 square feet of floor area makes it the largest single uninterrupted space yet built

In a comparative sense, the Dock's height is equal to a 22 story building, it is the largest structure in the world without interior support, ten football games could be played simultaneously under its roof It is so big, in fact, that the engines on the airships can be "run up" inside the structure without discomfort to workmen or danger of carbon monoxide poisoning

In effectively launching and docking huge rigid airships, the Dock had to be designed to reduce air-current interference to a minimum It was with this thought in mind that Dr Karl Arnstein, GAC's retired Vice President in Charge of Engineering, specified the building as a semi-paraboloid structure

The most unique feature of the Dock is probably its identical spherical doors with their supporting trucks and operating mechanism, with individual power plants separately housed at each end of the building The doors are two-piece and shaped somewhat like one-quarter of an orange peel. Each of the four sections weighs 600 tons The doors are fastened at the top by huge hollow-forged pins 17 inches in diameter and six feet long The doors rest on 40 wheels set radially on curved standard railroad track Time of opening or closing is approximately five minutes

DIVERSIFIED INDUSTRY

Akron is also well known as the birthplace of the trucking industry The enterprising rubber producers, sensing an important new market for their tires, were among the first industries to ship by truck Today Akron is headquarters for nearly 100 motor freight companies with more than 15,000 trucks and trailers

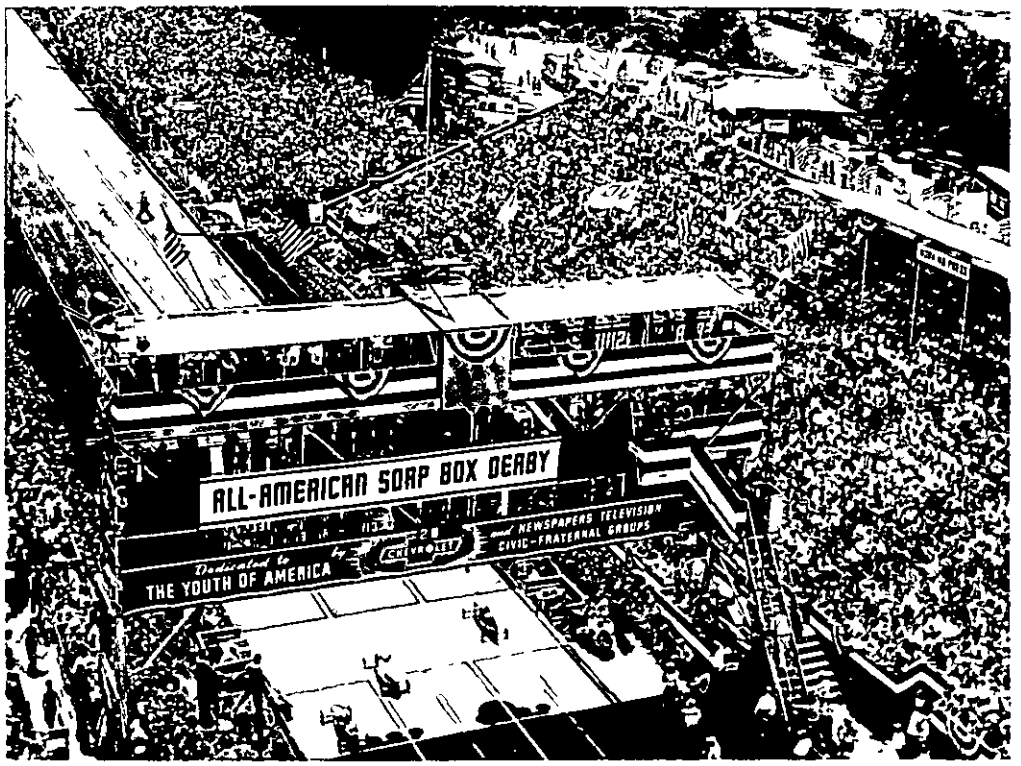
Also located here are two of the largest concerns in their respective fields – the Saalfield Publishing Co , publisher of children's books, and the Enterprise Manufacturing Co , makers of world-famous Pflueger fishing tackle

Metal working is another important industry The units of this industry range from small tool and die shops to big factories producing machinery used in the rubber industry and other similar types of business

Two big new industries recently located in northern Summit County a few miles from Akron. One is the new Chrysler Corporation stamping plant at Twinsburg and the other is the Euclid Division of General Motors Corporation, which manufactures road machinery, an industry expected to boom with the opening of the huge new federal highway program

The diversified list of other products made in Akron area plants includes chemicals and plastics, salt, cereals, clay products, matches, paint and varnish, paper and boxboard, porcelain products such as glove forms and insulators, aircraft parts, heating and air-conditioning equipment, storm windows and doors, mattresses and upholstered furniture, concrete blocks, electric motors, wire drawing machinery, marine equipment, molds for rubber and plastic manufacturers, rubber toys, fabricated and wrought iron steel products, tools, both hand and power, and wood turnings

Aside from its industrial importance, Akron is known as the host city for the All American Soap Box Derby and such famous golf events as the Rubber City Open, the new American Golf Classic, the 1960 P G A Tournament, and the 1962 World Series of Golf



FINISH LINE AT AKRON'S ALL-AMERICAN SOAP BOX DERBY

Since 1934, with the exception of four war years, the ALL-AMERICAN SOAP BOX DERBY has carved a significant place for itself as a vital youth event in America Each year, Akron, Ohio, the home of the ALL-AMERICAN, rolls out the royal welcome mat for more than 180 local champions from all over the United States and many foreign countries for this "greatest amateur racing event in the world."

The entire business district is lavishly decorated in Derby colors and banners, and Main Street becomes ALL-AMERICAN BOULEVARD for the festivities during "Derby Week " To make certain each "Champ" is identified to the tens of thousands of visitors that pour into Akron, giant placards along the Boulevard feature the name of each boy and the city or country he represents

The Akron Chamber of Commerce, its committee, merchants and the entire community join together to make every Derby Boy feel that he is a true champion, for each entrant in the ALL-AMERICAN has earned the honor of competing for national recognition and over $15,000 in scholarships and other prizes by winning the grand championship in his local derby "back home "

The 180 Champs competing at Akron actually are representing some 50,000 boys who experienced the thrill of creating a racer with their own skill and ingenuity and entering in competition with other fine boys like themselves

AKRON UNIVERSITY STUDENT CENTER

As a municipal institution serving a world famed industrial area, the University of Akron strives to provide an excellent academic education for the college-age youth of the community In addition, the University provides facilities for adult education and many civic, cultural and educational community events

Buchtel College, named for its most generous financial supporter, John R Buchtel, became the core of the University of Akron in 1913 when all assets of the college were accepted by the City as a foundation upon which the new University would grow

Today, students can earn bachelors' degrees in the Colleges of Liberal Arts, Engineering, Education, Business Administration and Law

Masters' degrees are offered in all the colleges, through the Graduate Division The Doctor of Philosophy degree is offered in Chemistry by the Buchtel College of Liberal Arts

AKRON YMCA

The Akron YMCA serves more than 16,000 boy members in the Central Building and seven Youth Branches The program features gym and swim classes, boys' clubs, hobbies and crafts, citizenship training, informal education, teen-age parties, and special family activities

STAN HYWET HALL

One of the finest examples of English Tudor Revival architecture in the United States, Stan Hywet Hall was built by Frank A Seiberling, founder of the Goodyear and Seiberling rubber companies It is a memorial to England's great Elizabethan period, a monument to America's period of great wealth, a collection of art treasures envied by museums and a place where history has happened

RESIDENTIAL SECTION OF CUYAHOGA FALLS

The City of Cuyahoga Falls is blessed with an immense natural beauty and the people have capitalized on this beauty as part of the charm of both the modest and more elaborate homes Interesting variety in style is seen as you drive throughout the community. The architectural types range from colonial to modern homes of steel and glass

CUYAHOGA FALLS FIRE DEPARTMENT

Cuyahoga Falls has one of the most modern, completely equipped fire departments of any city of comparable size in the State of Ohio

Because of the department's fine fire prevention program, the City enjoys an excellent fire safety record Only three major fires have occurred in the past 30 years

CUYAHOGA FALLS CITY BUILDING

As the county seat for Summit County (population 510,000) Akron is located in the market center of America, with 100,000 people within a radius of 500 miles having 75 per cent of the nation's buying power.

For prospective new industries and business ventures, Akron offers excellent plant sites, water supply, skilled labor, transportation facilities, accessibility of raw materials, abundant electric power at low rates, and a Chamber of Commerce working fulltime with business, industry and government to promote Akron's great potential

For additional information write the Akron Chamber of Commerce, 137 South Main St , Akron 8, Ohio

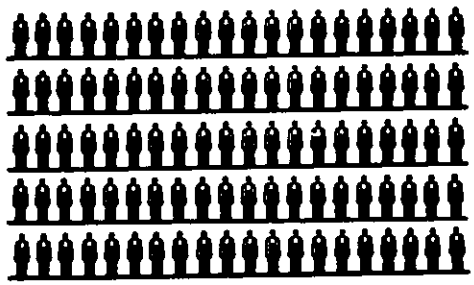
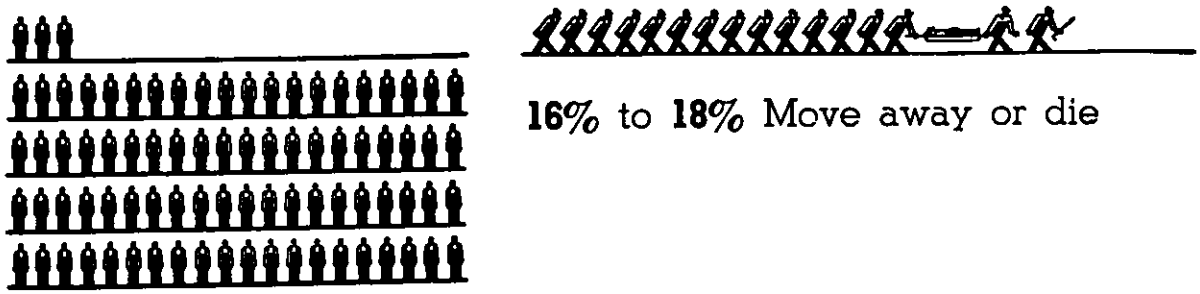
Printed matter Including Newspapers to all foreign countries except Canada and Mexico, 5 cents for first two ounces and 3 cents for each additional two ounces

Parcels Rates and conditions vary to different countries, call at Post Office

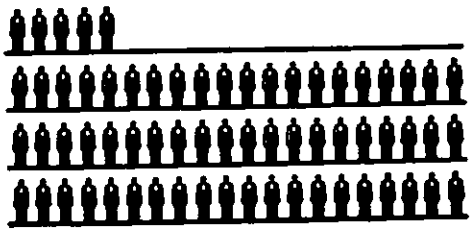
HOW MANY CHANGES IN A YEAR?



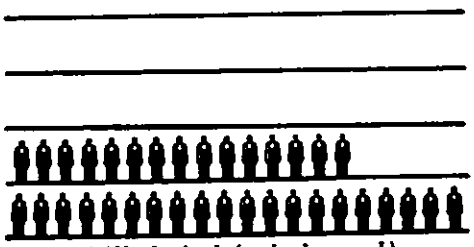
Out of every **100** People as listed in the last Directory



16% to **18%** Move away or die



17% to **19%** "New" people move into town or reach listing age.



(All that's left that's good)

26% to **29%** More change their addresses or their jobs or some other vital fact that affects their listing.

Making a total of **59%** to **66%** of the People listed who have new information in some particular which can be surely found only in the **NEW DIRECTORY**

Note: These figures are from repeated checks in numerous cities and do not vary 5% in any one year.

THAT IS WHY NEW DIRECTORIES MUST BE PUBLISHED EVERY YEAR.

SPECIAL

CLASSIFIED

ADVERTISING DEPARTMENT

AND

BUYERS' GUIDE

OF THE

AKRON CITY DIRECTORY

1962-63

This section of the Directory contains the Advertisements and Professional cards of the more progressive business men, classified according to their respective line of business or profession. In brief, they are the men who are making business and history for Akron. Patronize them and you will be sure of a square deal.

We have on file in our Directory Library every issue of the Akron City Directory, beginning with the 1868 edition, down to the current issue. These volumes contain a wealth of information concerning the people who were listed in the Directory during the past 82 years.

Persons listed in the earlier Directories are now only memories, but their listings in the Directory remain the same as when they were here in person.

These rare volumes, as well as hundreds of current Directories of other cities, are available for public reference, without cost,—just a part of our service.

The Sign Over Your Door

Is a good thing, isn't it? You would not think of doing business without it.

But it is only seen by those who pass your way.

If you could put a sign where everyone could see it would it interest you?

THE CITY DIRECTORY

Is where people look for you when they want to do business. You should make it easy for them to find you, by putting such information as a buyer wants, in the Directory properly indexed under all headings where he might look for you.

To be properly registered costs less than to be left out

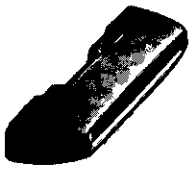
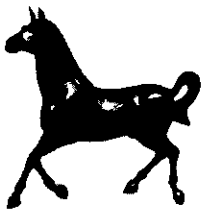
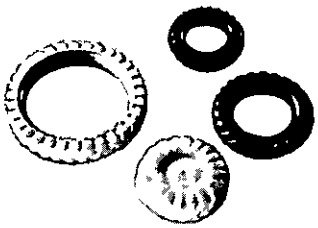
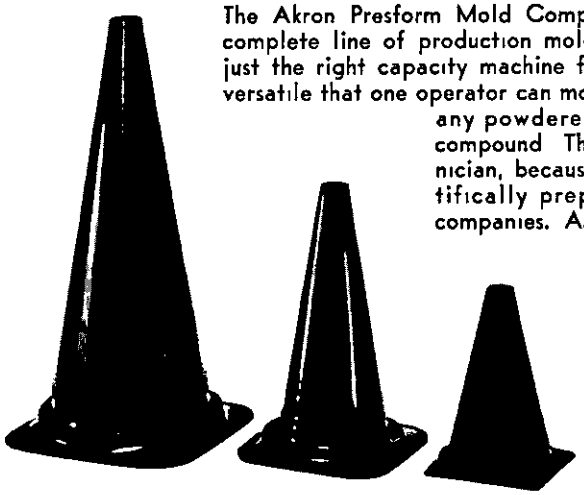
The only complete line of production rotational molding equipment

Protected by 11 Patents—5 others pending

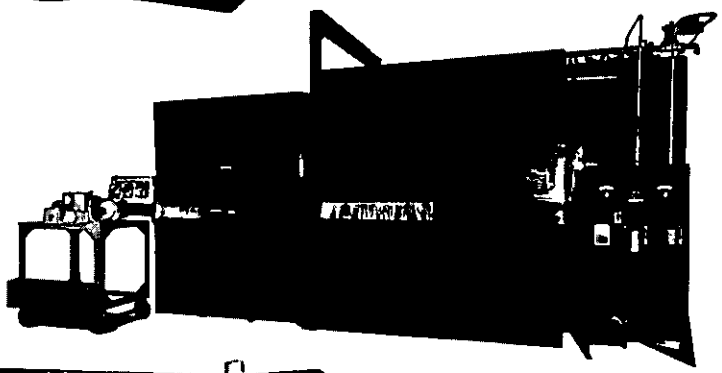




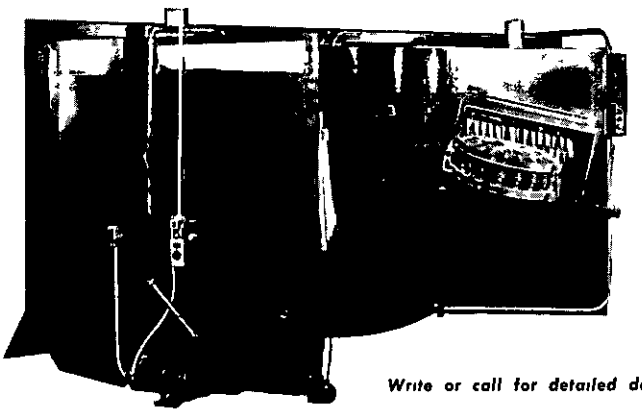




The Akron Presform Mold Company is the only company with a complete line of production molding equipment, so as to provide just the right capacity machine for your production. Machinery so versatile that one operator can mold up to 2000 items per hour from any powdered, granulated or liquid molding compound The operator need not be a technician, because all the raw materials are scientifically prepared, by the nation's foremost companies. Any hollow article can be molded from the raw material to a finished product in one operation Our complete line of production rotational molding equipment assures the correct machine, dispensing unit and multiple cavity molds assembled onto our patented spider to satisfy your requirements



The single spindle machine, shown at right, is available with a 15", 25", or 75" diameter molding area.



The multiple spindle machine, shown at left, is available with a 25" or 75" diameter molding area

ADVERTISERS WHO KNOW

That which makes any advertiser's approval worth while is the prominence he has attained in his particular line of work.

The *advertisers in the Directory* are competent judges on the subject of advertising mediums — the fact that they approve of *Directory advertising* is evidenced by their continued patronage.
