AKRON BEACON JOURNAL  
INDEX

**FORWARD**

This selective index of Ohio news and opinion, compiled from the Home Final Edition of the Akron Beacon Journal, is intended as a key or guide and not as a digest or summary. However, the information given will often be found adequate without reference to the newspaper or to the microfilm copy.

Since the New York Times Index covers national and foreign news, such material has been omitted from this index. Other omissions are as follows:

**Advertisements**

Announcements of routine meetings of social, fraternal, and minor political organizations; announcements pertaining to routine sports events

Commercial and promotional publicity on topics such as real estate, resorts, and automobiles

Features or columns dealing with trivia, recapitulations of news, or non-news educational topics

Lists which appear regularly such as vital statistics, incorporations, radio programs, time tables, theater schedules, stock and bond quotations, and prices

Non-news items relating to material such as recipes, menus, household hints, budgets, care of pets, care of babies, personal adornment, patterns, fashions, advice to the lovers, gardening, games, and hobbies

Poetry and fiction

Reprints

Reviews of burlesque and radio performances

Society personals and minor couings and goings

Touring maps and information

The index for 1931 contains 28,000 entries representing 226,000 column inches or 10% of the total column inches in the Akron Beacon Journal for this year.

1931

The Newspaper Index Project is sponsored by the Ohio State Archaeological and Historical Society. The Akron Beacon Journal Index is co-sponsored by the Akron Public Library and the City of Akron.

Acknowledgments are due the Akron Beacon Journal, the Akron Public Library, and the Ohio State Archaeological and Historical Society for supplying the necessary newspaper files. The Akron Beacon Journal has also contributed importantly in the matter of office space and equipment. The Ohio State Archaeological and Historical Society has supplied valuable technical aid since the inception of the Project.

#### HOW TO USE THE AKRON BEACON JOURNAL INDEX

Index entries are arranged alphabetically under subjects and proper names. In most instances material has been filed under specific rather than under general headings. Examples: Baseball news is under BASEBALL and not under SPORTS; news concerning the New York Central Railroad is under that name and not under RAILROADS or TRANSPORTATION. With few exceptions names of organizations appear under the key word of the name. Examples: NEGRO WOMEN'S CLUBS IN OHIO, ASSN OF FRIENDS OF ETHIOPIA, AMER COM OF LABOR, OHIO FED OF. Exceptions: chambers of commerce, companies, and some well-established names. Whenever necessary, headings are subdivided by geographical and topical subheads and sub-subheads. Examples: FRANCE - Politics and Government; SCHOOLS - Ohio - Textbooks.

The proper name or subject heading is followed by a brief descriptive sub-entry and by a reference line. The following arrangement of sub-entries under headings is generally observed: Unrelated sub-entries are paragraphed singly in chronological order. In the case of related sub-entries continuity is maintained by arranging the items chronologically within the same paragraph. In a few other instances, where material is entered only under general headings (e.g., BOOKS, MOTION PICTURES, BIRTHS, DEATHS, MARRIAGES), the sub-entries are arranged alphabetically.

The reference line indicates date, page, and column. Example: N 1, 9:2, meaning November 1, page 9, column 2.

When the location of an event is not expressly designated or otherwise indicated, the place of action is local.

The following are examples of index entries for a person, an organization, and a subject, with reference lines:

ABBOT, HOWARD Y  
Killed in auto collision, Ja 19, 6:4

MOOSE, LOYAL ORDER OF  
Selects Clev for 1937 conv; elects 2  
Chicoms officers, Chicago, Jy 5, 15:6

PEACE AND WAR  
Internatl police force urged as means of  
insuring permanent peace, ltr, O 3, 8:5

Cross references are used to direct the reader to the proper heading or to additional material under related headings. Examples:

AVIATION. See Aeronautics

REAL ESTATE  
See also Buildings; Mortgages; Taxation

Faint, illegible text at the top of the left page.

Main body of faint, illegible text on the left page.

Faint, illegible text at the bottom of the left page.

KEY TO ABBREVIATIONS

Table with multiple columns mapping abbreviations to their full names. Includes sections for A-Z, and specific abbreviations like AMU, AN & Y, etc.
