

Summit County Index to Ohio State Penitentiary Prisoner Registers, 1840-1938

This is an index to the microfilmed Ohio State Penitentiary Prisoner Registers that are located in the Special Collections Division of Akron-Summit County Public Library. Only prisoners convicted in Summit County who served time in the Ohio State Penitentiary are included. Each inmate is indexed by the name under which he entered the penitentiary. Many convicts had multiple aliases and did not always enter correctional institutions under their real names. In some cases, real names are identified along with nicknames and aliases in the actual registers. This index does link known aliases to inmates. Because of common names, it is up to the researchers to identify the correct inmate they are researching. A few women listed in early registers are also included.

The index provides name, race, age, date received into the penitentiary, and the volume and page on which the inmate can be found in the microfilmed registers. If there are two dates in the "received" field of the index, this means that the inmate started his sentence in another institution and was transferred. An "*" after a page means that all six pages are in the register but are out of order.

Up through most of 1913, the registers contain information across six ledger pages on each prisoner and include: *prisoner's number, prisoner's name, aliases and nicknames, age, race, crime, term of sentence, month and year of trial, date received into the penitentiary, date of expected release, parole, transfers, execution, birth location, occupation, education, physical description, temperament, habits, marital status and other notes. In addition, the name and address of a relative is included.* The information after 1913, unfortunately, excludes the personal data and only spans two pages.
